Summary

Software Engineer with experience in React.js, Next.js, Node.js, Express.js, Django and MongoDB, focused on developing scalable full-stack web applications and REST APIs. Skilled in frontend and backend development, database optimization, and building efficient, high-performance applications. Improved application performance through database query optimization, backend enhancements, and responsive user interface development. Familiar with Python, Django, Flask, Docker, Git, and CI/CD pipelines, with knowledge of modern software development practices.

Technical Skills

Languages: Python, JavaScript, TypeScript, SQL, Java

Frontend: React.js, Next.js, Redux Toolkit, Tailwind CSS, HTML5, CSS3

Backend: Django, Flask, Node.js, Express.js, REST APIs, JWT, OAuth 2.0, RBAC

Cloud & DevOps: Docker, Jenkins, Git, GitHub, CI/CD Pipelines, Postman

Databases & AI: MongoDB, PostgreSQL, MySQL, Firebase, LLMs, RAG, AI Agents

Education

Koneru Lakshmaiah Education Foundation (KLEF), Guntur, Andhra Pradesh

Expected Aug 2027 | CGPA: 8.62/10

B.Tech in Computer Science and Engineering

Relevant Coursework: Data Structures & Algorithms, OOP, DBMS, AI/ ML

Experience

EtharaAI

AI Intern | Jan 2026 – May 2026

Gurugram, India | AI, LLMs, RAG, Data Evaluation

Certificate

- Contributed to AI and Large Language Model (LLM) post-training workflows through data preparation, response evaluation, and quality analysis to improve model performance and reliability.
- Performed structured data processing, validation, and prompt evaluation while ensuring data quality, consistency, and accuracy across AI model evaluation workflows.
- Collaborated with mentors and cross-functional team members in a professional environment, strengthening analytical thinking, problem-solving, communication, and teamwork through hands-on project experience.

Projects

COGNIVIEW — AI Voice Interview & Placement Practice Platform

GitHub | Live

Stack: Next.js, TypeScript, Firebase, VAPI, REST APIs

- Developed a full-stack AI-powered voice interview platform using Next.js and REST APIs, enabling real-time speech-to-text processing, interview evaluation, and interactive placement practice.
- Implemented AI-powered scoring and personalized feedback systems to evaluate communication, technical responses, and overall interview performance, delivering role-specific insights and an enhanced user experience.

NEXTHIRE — AI Job Portal

GitHub | Live

Stack: React.js, Node.js, Express.js, MongoDB, JWT, REST APIs, WebSockets

- Developed a scalable full-stack job portal with secure JWT authentication, role-based access control (RBAC), real-time communication, and RESTful APIs for recruiters and job seekers.
- Optimized MongoDB queries, designed scalable RESTful APIs, and enhanced backend performance to ensure efficient data management, reliability, and seamless application performance.

CODESYNC — Collaborative Code Editor

GitHub | Live

Stack: Python, Django, MongoDB, Socket.IO, JWT, REST APIs

- Developed a scalable real-time collaborative code editor using Python and Django, featuring secure JWT authentication, role-based access control, synchronized multi-user code editing, and RESTful APIs for seamless collaboration.
- Implemented live group coding sessions with integrated group chat, video conferencing, AI-powered coding assistance, and real-time collaboration using Socket.IO, delivering an interactive and efficient developer experience.

Certifications & Training

- GitHub Foundations (2026) | MongoDB Certified Developer – Associate (2025)
- Oracle Cloud Infrastructure Certified Developer Professional (2026) | Salesforce Certified AI Associate (2025)

Achievements

- Built 70+ GitHub repositories with 1,200+ contributions across full-stack, backend, and web development projects.
- Designed and implemented scalable web applications with responsive user interfaces and RESTful backend services.
- Participated in 3 national-level hackathons (Smart India Hackathon, HackVega, Tata Imagination Challenge).
- Led a team of 5 as a core member, organizing technical events and coding competitions for 200+ participants.
