TECHNICAL SKILLS

Programming Languages: Java, C++, JavaScript, SQL, TypeScript

Frameworks & Technologies: React.js, Node.js, Express.js, Spring Boot, Microservices

Tools & Platforms: Git, MongoDB, MySQL, NPM, REST APIs, NLP, JWT **Core**

Concepts: Data Structures and Algorithms, OOP, Databases

Soft Skills: Problem Solving, Teamwork, Adaptability, Communication

EDUCATION

Koneru Lakshmaiah Education Foundation, Guntur, Andhra Pradesh

July 2023 – Aug 2027

B.Tech – Computer Science and Engineering

CGPA: 8.6

PROJECTS & EXPERIENCE

NEXTHIRE

[Live Link](#) | [GitHub](#)

Technologies Used: React.js, Node.js, MongoDB, WebSockets, JWT, Bcrypt, AI APIs

Description: A full-stack job portal connecting job seekers and employers with real-time chat, video interviews, and advanced AI tools.

Features: Implemented secure JWT and Bcrypt-based authentication, enabled real-time chat and video interviews using WebSockets, and integrated AI-driven functionalities such as job recommendations and resume parsing.

– Enhanced user experience with mock tests, smart notifications, premium dashboards, and a seamless one-click application process.

ARISE

[Live Link](#) | [GitHub](#)

Technologies Used: Next.js, React.js, MongoDB, Clerk, Gemini AI, Prisma, Shadcn UI, WebSockets

Description: A full-stack AI platform enabling users to build optimized resumes, generate tailored cover letters, practice mock interviews, and create professional portfolios.

Features: Secure authentication with Clerk, AI-powered resume and cover letter generation and mock interview practice with instant feedback.

– Fine-tuned user experience with GitHub README and portfolio generators, ATS score checker, smart notifications, and a modern, responsive UI.

COGNIVIEW

[Live Link](#) | [GitHub](#)

Technologies Used: Next.js, TypeScript, Firebase, Voice AI (VAPI), Google Gemini, Tailwind CSS

Description: An AI-powered interview platform that revolutionizes hiring with voice-enabled interviews, intelligent chat assistance, and advanced interview management.

Features: Provides voice-driven interviews using VAPI, secure authentication via Firebase, and Gemini-based AI chat assistance for interview preparation and career guidance.

– Enhanced the user experience with real-time interview management, interactive dashboards, multi-modal AI interactions, GitHub profile evaluation, task management, and a modern, responsive UI.

CERTIFICATIONS & ACHIEVEMENTS

- **MongoDB** – Associate Developer (Certified)
- **OCI** – Certified Generative AI Professional (Certified)
- 650+ GitHub Stars | Hacktoberfest & Open-Source Contributor
- **Hackathon Participant** – Smart India Hackathon (SIH), HackVega & Tata Imagination Challenge
- **Core Member** – Content Team, Mayavi Club
